

Nick meeting cheat sheet

Wednesday, August 19, 2026

1:00 to 2:00 PM Eastern

In person

Nick, President of UVALUX

Leave with four things: Nick's honest concept read, branding direction, introductions to 3 to 5 trusted salon owners, and a named next step with a date.

START WITH HIS OUTCOME

First five minutes

Existing relationship. Talk with Nick, not at him. Discovery comes before the product tour.

SAY THIS FIRST

Nick, before we get into it, I have a few things I want to make sure we cover. I am sure you do as well. Exactly what is the most important thing you want to accomplish today?

FounderVision: outcome-first opening

SET THE CONTRACT

At the end of our conversation, there are really three outcomes: yes, no, or we need more information. Any of those are fine with me. Can we agree to be honest about where we stand?

FounderVision: up-front contract

Posture

Do not force the prepared tour over Nick's stated outcome. Listen, summarize, then show only the Bask and Compass moments that answer what he said.

NO SURPRISES IN THE ROOM

Preflight

The real artifact is the screen Nick sees. Check the composited path before leaving.

30 MINUTES BEFORE

- ☐ Open only **bask-psi.vercel.app**.
- ☐ Walk the exact guided path once.
- ☐ Load **promo-vo-720.mp4** locally and scrub to its end.
- ☐ Confirm laptop sound, battery, charger, and hotspot.
- ☐ Put phone on Do Not Disturb.

PHONE SETUP

- ☐ Open responsive live web on phone.
- ☐ Call it Bask on the web, not Bask Mobile.
- ☐ Keep base URL bookmarked.
- ☐ Close personal tabs and notifications.
- ☐ Keep PDF available offline.

NEVER BEFORE MEETING

- Do not reset demo data. Local reset shares production database.
- Do not open a saved campaign detail URL.
- Do not use **bask.vercel.app** or a hashed deployment URL.
- Do not install updates in the room.

Meeting run of show

Demo ceiling: 15 minutes. Give the saved time back to Nick.

0 to 5

Reconnect, outcome, up-front contract

Ask what Nick wants from the hour. Agree on yes, no, or more information.

5 to 15

Discovery before demo

Current salon software, recurring complaints, rep needs, useful signals, privacy boundary.

15 to 17

Play the 1:44.8 film

Use promo-vo-720.mp4. One sentence after: this is the operating system and network view the live build explores.

17 to 32

Guided product demo

Show only the route below. Slow down where Nick leans in. Skip what does not map to his answer.

32 to 45

Deep discovery

Brand, customer access, owner introductions, commercial preference, objections.

45 to 52

Tie the bow and test fit

Summarize current state, desired state, and Bask's possible role. Ask if it matches.

52 to 60

Make the ask and calendar next step

Concept read. Brand direction. 3 to 5 introductions. Owner, action, date.

MAXIMUM 15 MINUTES

Live demo route

Responsive web on phone or laptop. It is not a native app.

-
- 1 Daybreak** 1 minute
Open the home view. Show the slow-Tuesday signal and the day's operating priorities.
Say: "One screen tells the owner what needs attention before the day gets away from them."
 - 2 Studio campaign** 2 minutes
Start a fresh guided campaign from the Tuesday insight. Do not open an old campaign detail link.
Say: "The signal turns into a usable action without leaving the operating system."
 - 3 Floor, check-in, waiver, POS** 4 minutes
Show one customer path from arrival through service and checkout. Equipment state and payment events are simulated in this build.
Say: "This is the hourly layer that largely sits outside the current UVALUX relationship: service, retail, staff, equipment, and customer flow."
 - 4 Inventory and UVALUX draft order** 2 minutes
Show product movement reaching a reorder decision. Catalogue and pricing are curated demo data, not a live account integration.
Say: "Operations can write demand back toward UVALUX instead of waiting for the owner to notice a shelf."
 - 5 Campaign result and Peers** 2 minutes
Show the closed loop and peer context. Campaign delivery, results, and benchmark cohorts are staged for discovery.
Say: "The value is not another dashboard. It is seeing an issue, taking action, and learning what changed."
-

6

Compass and consent 4 minutes

Open network, call-list concept, then data-sharing settings. Show derived business signals without exposing customer names, contacts, or transactions.

Say: "Bask helps the salon run. With explicit salon consent, Compass could help UVALUX see where support matters across the network."

Truth line

"This is a polished interactive discovery build. It is here to test the workflows and partnership shape. Production integrations, authentication, hardware verification, and compliance work remain." Bask, Compass, Daybreak, Floor, Studio, and Peers are working names.

Questions for Nick

Ask, listen, write his words. Use "What else?" until the answer is dry.

MUST ASK

- 01** What is the most important thing you want to accomplish today?

Listen for outcome

- 02** What software are salons using now, and what complaints keep reaching you?

Listen for pain

- 03** What does a UVALUX rep wish they knew before calling or visiting a salon?

Listen for signal

- 04** Where is the privacy line that UVALUX and salon owners cannot cross?

Listen for trust

- 05** How should UVALUX show up: UVALUX-branded, co-branded, powered by, or behind the scenes?

Listen for brand

- 06** Who are 3 to 5 trusted owners you would introduce so we can learn what survives contact with a real salon?

Listen for access

QUESTION BANK

- 01** How many active salon customers does UVALUX serve, and what share includes tanning?

- 02** How many new salon openings does the team touch in a typical year?

- 03** Where do incumbents create the most friction for owners or reps?

- 04** Which signals matter most: struggling location, expansion, equipment, retail, staffing, or retention?

- 05** Would the best first wedge be new openings, existing salons, or a specific owner group?

- 06** If owner conversations validate this, which structure fits UVALUX best: license, reseller or revenue share, investment, or another model?

- 07** Who besides you needs to believe this before a next step is real?

- 08** What would make you say no?

TIE THE BOW BEFORE SHOWING MORE

It sounds like you are at [current state], trying to get to [future state], and you think [the role Bask or Compass could play] could help get you there. Does that sound right, or am I forgetting anything?

FounderVision: current state to future state summary

DISCUSS ONLY AFTER FIT

Commercial working board

These are exploration anchors. None is approved pricing, a quote, or agreed structure.

WORKING HYPOTHESIS

CAD \$199

Core per location, monthly

Internal product hypothesis for salon operating software.
Not a quote.

WORKING HYPOTHESIS

CAD \$299

Intelligence per location, monthly

Internal product hypothesis for expanded intelligence.
Not a quote.

WORKING HYPOTHESIS

2 to 3 salons

Small validation group

Possible learning shape only.
The build is not yet pilot-ready.

STRUCTURE OPTIONS TO TEST

- **Reseller or revenue share:** UVALUX carries the relationship and participates in recurring value.
- **License:** clear rights and economics around a UVALUX-positioned product.
- **Investment:** capital plus distribution alignment.
- **Another structure:** ask Nick what matches how UVALUX actually operates.

SAFE PRICING ANSWER

We have internal working hypotheses, not final pricing. I want the owner conversations and UVALUX structure to shape the real offer before I pretend the number is settled.

Use only if Nick asks for price before validation.

Objection lines

Answer, verify understanding, return to discovery. Do not defend what is not built.

"Is this production software?"

No. It is a deployed interactive discovery build. It demonstrates proposed workflows for evaluation. Production work remains.

"Does it run T-Max or bed timers?"

Not today. The integration boundary is designed, but hardware needs bench verification before I promise compatibility.

"Are payments and messages real?"

No. Payment events, campaign publishing, and results are simulated in this build. Production providers are still a decision.

"Where is the mobile app?"

A native app is not built. What you are seeing on the phone is the responsive live web product.

"Who owns the data?"

The design gives the salon explicit sharing controls. Compass uses derived business signals, not customer names, contacts, or transactions. Legal and compliance work still needs to validate that design.

"How would migration work?"

Working direction is new salons first and concierge import later. I will not promise payment-token portability or a migration path before we verify the source systems.

"What does this cost?"

The current numbers are hypotheses, not a quote. First validate owner demand and choose the UVALUX structure, then price the real scope.

"What do you need from me?"

Your honest read, brand direction, introductions to 3 to 5 trusted owners, and a dated next step if the concept earns one.

Unknown answer

"I do not know yet. I will verify that and send you the answer by [day and time]."
Write it down before moving on.

Close the meeting

No vague "let me know." Every good outcome receives an owner, action, and date.

1 Tie current state to future state

Use his words, not your pitch language. Ask whether the summary is right or missing anything.

2 Test fit

Does that match what you need?

STOP TALKING

3 Ask for Nick's read

What is your honest read on the concept? What feels strongest, and what misses?

LISTEN THROUGH THE PAUSE

4 Ask for brand direction

If this earns a place with UVALUX, how should UVALUX show up: UVALUX-branded, co-branded, powered by, or behind the scenes?

5 Ask for market access

Would you introduce me to 3 to 5 salon owners you trust so we can learn what survives contact with the real operation?

MAKE THE ASK ONCE, THEN SILENCE

6 If he stalls, flip the perfect deal

I hear you. I understand. What would need to be included to make this perfect for you?

Then ask "What else?" until no condition remains.

7 If he opens commercial structure

How are you feeling so far? Ready to tackle investment or structure? Want to go over it?

State the working hypothesis once, label it unapproved, then wait.

8 Calendar the next move before standing up

Let us put the next move on the calendar now: [action], owned by [name], on [date and time].

If no decision: "If I have not heard by [day], I will follow up. Fair enough?"

Fallback map

A broken route changes the route, not the truth.

INTERNET FAILS

Film plus PDF

Play local 720p film. Use this sheet to tell three beats: salon operations, closed-loop action, consent-gated UVALUX intelligence.

ROUTE STALLS

Return to base URL

Do not start a refresh cascade. Return to home, explain what you intended to show, and move to the next working route.

CAMPAIGN BLANK

Use fresh guided path

Never use a saved campaign detail link. Start from the current Tuesday insight or skip the detail.

NO ACTIVE BED STATE

Show the workflow

Run check-in and the guided state change, or skip the status ring. Do not imply live hardware.

NICK WANTS BUSINESS

Stop touring

Skip remaining product screens. Ask brand, access, structure, and decision-process questions.

NICK SAYS NO

Do not argue

Ask: "What misses?" Learn the condition, confirm it, and leave with a clean no or a specific next step.

Red lines

Say less. Do not upgrade hypotheses into facts.

DO NOT CLAIM

- Native Bask or Compass mobile app exists.
- Product is production-ready or pilot-ready.
- T-Max or other hardware is certified or integrated.
- Payments, messages, campaign results, or benchmark data are live.
- Pricing or commercial structure is approved.
- UVALUX branding or participation is approved.
- Migration, privacy compliance, or payment-token portability is solved.
- Unknown UVALUX customer counts or market figures are facts.

DO SAY

- Polished interactive discovery build.
- Responsive live web on phone.
- Hardware designed as an integration boundary, verification pending.
- Simulated events and staged data where relevant.
- Working pricing and structure hypotheses.
- Consent-gated product design, legal validation pending.
- Unknowns get a named verification date.

DOOR CHECKLIST

Bring and leave with

Physical meeting. Offline copy, power, connection, and a place to capture Nick's exact words.

BRING

- ☐ Laptop and charger
- ☐ Phone or tablet with responsive Bask bookmarked
- ☐ Hotspot and charging cable
- ☐ HDMI or USB-C display adapter if a screen is expected
- ☐ promo-vo-720.mp4 stored offline
- ☐ This PDF stored offline and one printed copy
- ☐ Notebook and pen
- ☐ Optional lotion or barcode prop only if already available

LEAVE WITH

- ☐ Nick's exact strongest point
- ☐ Nick's exact concern or no condition
- ☐ Branding preference
- ☐ Names of 3 to 5 possible owner introductions
- ☐ Other decision-makers named
- ☐ Every unknown assigned a response date
- ☐ Next action, owner, and date on calendar

Live links

No campaign ID links. Start from stable route surfaces.

Daybreak
